JavaScript/JQuery

SQL & NoSQL Databases

React.js

Node.js

Express

Projects

Busks In Town

Github: <https://github.com/datrimboli/BusksInTown>

Deployed Version: <https://guarded-crag-60613.herokuapp.com/>

This full stack application is a similar app to bands in town. Any band, artist, or musician of any kind, can make an artist profile, and post a local busk wherever they want to perform. Being in a pandemic and having music venues being closed has made it very difficult for musicians and artists to perform live. You can

always perform a busk on a street corner or outside of a local grocery store! This app has created a unique and simple way to showcase your busks and your art with the community

Responsibilities: Front End Design, Logo Development, Database Statistics

Tools / languages used: Sequelize, mySQL2, Handlebars, Bootstrap, Animate.style, Local Storage

Poke Project

Github: <https://github.com/Kalynbsimms/pokeProject>

Deployed Version: <https://kalynbsimms.github.io/pokeProject/>

This application is a Pokemon fan page made for fans, by fans. It has multiple pages including ones for Data, Cards, Trivia, and a Blog, along with a separate page designed for the user to get to know the creators of the application.

Responsibilities: Front End Design, Nav Bar Creation, Mobile Responsive Functionality

Tools / languages used: PokeAPI (Third Party API), Vanilla Javascript, HTML, CSS, Pokemon TCG API (Third Party API), Materialize.

Education

Bootcamp Certificate: University of California, Irvine. Irvine, CA

A 12-week intensive program focused on gaining technical programming skills in HTML, CSS, Javascript, JQuery, Bootstrap, Materialize, Node Js, MySQL, MongoDB, Express, Handelbars.js & ReactJS.
