Acknowledged by peers as a productive, persistent problem solver, who is always eager to learn more about cutting edge technologies and responsive web development.

TECHNICAL SKILLS

Languages: JavaScript ES6+, CSS3, HTML5, SQL, NoSQL, JQuery
Applications: GitHub, MongoDB, MySQL
Tools: Express, React, Node, Handlebars, Query, Bootstrap

PROJECTS

Busks In Town | https://github.com/datrimboli/BusksInTown
 |https://guarded-crag-60613.herokuapp.com/

- Summary: This full stack application is a similar app to bands in town. Any band, artist, or musician of any kind, can make an artist profile, and post a local busk wherever they want to perform. Being in a pandemic and having music venues being closed has made it very difficult for musicians and artists to perform live. You can always

perform a busk on a street corner or outside of a local grocery store! This app has created a unique and simple way to showcase your busks and your art with the community.
- Role: Front End Design, Logo Development, Database Statistics
- Tools: HTML, CSS, JavaScript, Bootstrap, Sequelize, mySQL2, Handlebars, Animate.style, Local Storage

Poke Project | https://github.com/Kalynbsimms/pokeProject

| https://kalynbsimms.github.io/pokeProject/

- Summary: This application is a Pokemon fan page made for fans, by fans. It has multiple pages including ones for Data, Cards, Trivia, and a Blog, along with a separate page designed for the user to get to know the creators of the application.
- Role: Front End Design, Nav Bar Creation, Mobile Responsive Functionality
- Tools: PokeAPI (Third Party API), Vanilla Javascript, HTML, CSS, Pokemon TCG API (Third Party API), Materialize.

EDUCATION

Bootcamp Certificate: University of California, Irvine. Irvine, CA

A 12-week intensive program focused on gaining technical programming skills in HTML, CSS, Javascript, JQuery, Bootstrap, Materialize, Node Js, MySQL, MongoDB, Express, Handelbars.js & ReactJS.
